Gentlemen:

This will acknowledge receipt of your application for renewal of the above referenced experimental permit, consisting of one page prepared by Robert M. Murphy, dated November 15, 1982 and received by the Agency on November 18, 1982.

The following comments have been made pursuant to the review:

Recent analyses of the auto shredding waste show PCB content in the waste. Special Condition #1 of the operating permit issued for the facility states that no special wastes are to be received at the site for disposal.

Based on the above, the Agency must deny the permit.

Very truly yours,

Harry A. Chappel, Manager
